ABOUT US

Sardes Food Industry, which was founded in 1996 by Agricultural Engineer Mehmet Demir as a family company in the Salihli district of Manisa, became known for its high-quality products in a short time.

By combining their knowledge, experience, and vision with the fertile lands, cultural heritage, and hardworking people of the region, our founder Mehmet Demir and his family made agricultural production not just a job but a way of life.

Sardes Gıda focused on the production of sun-dried tomatoes in the first years. It has become one of the leading producers and exporters of Turkey by specializing in all stages from cultivation to harvest, from production to packaging. Sardes Gıda also grows tomato, pepper and vegetable seedlings in its own greenhouses with its own agricultural engineers and their teams.

Extending its product range with new flavors over the years, Sardes has diversified both its product and processing method with the same vision. Many organic certified products for the food industry and retailers such as organic pepper varieties, organic grilled vegetables, organic sun-dried tomatoes, organic sauces and organic Bruschetta varieties, organic leaf wrap, organic capers, and organic extra virgin olive oil have gained a remarkable place in the world market.

To increase our organic product range and capacity, 600 decares of land suitable for organic farming were purchased in 2018 and the raw materials (tomatoes, peppers, onions, garlic, eggplants, etc.) we need within the scope of our ECOCERT-approved organic agriculture project are duly grown in our agricultural land.

In addition to our product recipes, we also produce products with the special recipes of our customers in the preferred packaging.

Sardes' quality practices aiming at the best in production and service are accredited by international quality organizations. Our company, which constantly follows innovations in organic product diversity and production techniques, implements projects with a high-quality understanding.

Sardes will continue to deliver organic products from the fertile lands of the Aegean to your tables in the most natural, healthy, and delicious form, with an understanding of respect for nature, people, and work.

95% of the organic products we produce are exported.
